The Clinical Trials Research Affinity Group (RAG) invites you to attend a seminar

Team Science - Answering Complex Clinical Questions Together

Tuesday, August 7, 2018
12:00 - 1:00 PM
Roberts Center for Pediatric Research
2nd Floor, Conference Room 2160
2716 South Street, Philadelphia, PA

Speaker:
Martha A.Q. Curley, RN, PhD, FAAN
Ruth M. Colket Endowed Chair in Pediatric Nursing
Children’s Hospital of Philadelphia
Professor, University of Pennsylvania School of Nursing

Lunch will be provided. Please RSVP to clinicaltrialsrag@email.chop.edu.

The Clinical Trials Research Affinity Group was created to build a community of investigators conducting clinical trials at CHOP and the greater UPENN community. The missions of this group are to establish a collaborative network of investigators with knowledge of or interest in clinical trials, to serve as a liaison between investigators and the CHOP Research Institute and hospital administration to facilitate not only the conduct and enhancement of on-going trials but also the start-up of new trials within the CHOP network, to provide a forum to keep investigators informed about the changing face of clinical trials (methodologies, regulations), and to facilitate identification of shared barriers to the conduct of trials and development of streamlined solutions.
